

# SIVA SATYA SAI RAM TOLETI

Full Stack Java Developer | Spring Boot & Spring AI | Generative AI

Delray Beach, FL | +1 (561) 664-3611 | toletisairam99@gmail.com | [LinkedIn](#) | [GitHub](#)

---

## PROFESSIONAL SUMMARY

Full Stack Java Developer with 4+ years of experience building enterprise applications end-to-end — REST APIs, microservices, and Spring Boot backends paired with React front ends. Holds a Master of Science in Computer Science from Florida Atlantic University (GPA: 3.93/4.00), focused on Generative AI, Machine Learning, and NLP. Brings that AI focus directly into full-stack Java systems using Spring AI, LangChain, and Retrieval-Augmented Generation (RAG). Experienced across the full software lifecycle including automation testing, database design, and CI/CD, with a track record of translating business requirements into scalable, production-ready solutions in Agile environments.

---

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, SQL

**Java / Spring:** Spring Boot, Spring MVC, Spring Core, Spring AI, Hibernate/JPA, Microservices, REST APIs

**Generative AI / ML:** Spring AI, LangChain, Retrieval-Augmented Generation (RAG), OpenAI GPT-4 API, HuggingFace, Prompt Engineering, NLP, Machine Learning, Deep Learning, Reinforcement Learning

**Front End:** React, Angular.js, HTML5, CSS3, JavaScript, AJAX, Bootstrap

**Databases:** MySQL, SQL Server, Oracle, PL/SQL

**Testing / QA:** Selenium, JUnit, BDD, Regression Testing

**DevOps / Tools:** Docker, GitHub Actions, Git, GitLab, Jira, Xray, Cloud Computing Fundamentals

**IDEs:** Eclipse, IntelliJ, VS Code, PyCharm, Jupyter, Google Colab

---

## PROFESSIONAL EXPERIENCE

### Software Engineer

Mar 2021 – Aug 2024

*Virtusa Consulting Services (Client: British Telecom — IT Asset Management enterprise application) — Hyderabad, India*

- Developed Python and Java database models, REST APIs, and views to power the IT Asset Management (ITAM) enterprise web application.
- Built and styled the application's user interface using HTML, XHTML, AJAX, CSS, and JavaScript.
- Partnered with business stakeholders and subject matter experts to gather requirements and translate them into technical specifications.
- Engineered a bulk-upload and processing feature using a custom Excel parser to validate and insert asset data into the database.
- Rewrote an existing Java program as a Python module to standardize and transform output data formats.
- Optimized database calls using SQL, Java Persistence API (JPA), and Hibernate to improve data-layer performance.
- Built dynamic web pages using React, HTML5, CSS3, jQuery, Angular.js, Bootstrap, LESS, SASS, and AJAX.
- Delivered coding, unit testing, and integration testing to produce executable, production-ready code, managing source control workflow via Git.
- Developed and maintained automated test scripts to support release quality during a QA rotation.

---

## PROJECTS

### AI-Powered Academic Assistant Bot (Discord)

Jan 2025 – Apr 2025

- Designed and developed a Discord-based assistant bot to help students learn programming and machine learning concepts interactively.
- Implemented personalized, context-aware responses using GPT-4, a multi-agent architecture via LangChain, and Retrieval-Augmented Generation (RAG).
- Built with a modular, containerized architecture using Docker and GitHub Actions to support scalability and automated deployment.
- Technologies: Python, discord.py, OpenAI GPT-4 API, LangChain, RAG, Docker, GitHub Actions

**GitHub:** [github.com/SairamGitSmash/Devara\\_owlmind](https://github.com/SairamGitSmash/Devara_owlmind)

## Eco – Carbon Credit System

Jan 2025 – Apr 2025

- Built a full-stack web application that awards carbon credits for sustainable commuting methods including walking, cycling, and public transport.
- Designed a personalized dashboard enabling users to track carbon savings and monitor environmental impact over time, with map-based trip visualization.
- Technologies: Python (Flask), Flask-SQLAlchemy, Flask-Migrate, Flask-WTF, HTML, CSS (Bootstrap 5), JavaScript, Leaflet.js, SQLite

**GitHub:** [github.com/SairamGitSmash/Eco-Carbon-Credit-System](https://github.com/SairamGitSmash/Eco-Carbon-Credit-System)

## EDUCATION

---

### Master of Science in Computer Science

Aug 2024 – May 2026

*Florida Atlantic University, Boca Raton, FL | GPA: 3.93/4.00*

- Relevant Coursework: GenAI Software Development Lifecycles, Computational Foundations of AI, Reinforcement Learning, Data Mining & Machine Learning, Natural Language Processing, Cloud Computing, Software Engineering, Social Networks & Big Data Analytics, Analysis of Algorithms, Introduction to Data Science, Internet of Things (IoT).

### Bachelor of Technology in Electrical & Electronics Engineering

Jun 2017 – Aug 2020

*Bonam Venkata Chalamaiah Engineering College, India — Affiliated to Jawaharlal Nehru Technological University, Kakinada (JNTUK)*

## CERTIFICATIONS

---

- Oracle Certified Associate, Java SE 8 Programmer — Oracle University
- Introduction to Prompt Engineering for Generative AI
